CONTENTS

Fungi and Fungi-like Organisms

- Prylutskyi O., Zinenko O., Havrysh P. First records of three *Lepiota* species (*Agaricales*, *Basidiomycota*) from Ukraine, with notes on a poorly known species *Lepiota subalba* 373
- Heluta V.P., Anishchenko I.M. Powdery mildew fungi (*Erysiphales*, *Ascomycota*) of Western Polissya of Ukraine 381
- Prydiuk M.P., Balahura O.M. First records of representatives of the genus *Lysurus* (*Phallaceae*, *Basidiomycota*) in Ukraine 399

Red Data Book of Ukraine

- Boichuk S.V., Budzhak V.V. Intraspecific taxonomy of *Muscari botryoides* s. l. (*Asparagaceae* s. l. / *Hyacinthaceae* s. str.): history of research and synonymy 407

Cell Biology and Molecular Biology

- Baik N., Bandou H., Gonzalez Garcia M., Benavente E., Vega J.M. Genetic diversity of ribosomal loci (5S and 45S rDNA) and pSc119.2 repetitive DNA sequence among four species of *Aegilops* (*Poaceae*) from Algeria 414
- Shevchenko G.V. Comparative organization of tubulin microtubules in root cells of *Zea mays* (*Poaceae*) and *Beta vulgaris* (*Chenopodiaceae* s. str. / *Amaranthaceae* s. l.) under the influence of clinorotation 426
- Korshikov I.I., Bilonozhko Y.O., Hrabovyi V.M. Cytogenetic characteristics of seed progeny of old-aged trees of *Pinus pallasiana* and *Picea abies* (*Pinaceae*) 434

News and Views

- Artemenko O., Boiko G., Hayova V. Botanical science in Ukraine – progress over the century, 1921–2021. On a centenary of the M.G. Kholodny Institute of Botany, NAS of Ukraine 442
